## HOW LONG WILL SANITIZERS PROTECT ME?

CBS News Medical Correspondent Dr. Jennifer Ashton tells "Early Show" co-anchor Harry Smith it's an important two minutes, though. "It really is!" Ashton said. "Well, we've said before that these are very, very effective in reducing transmission of the germs that can make us sick. It does not give you 100 percent protection and, in fact, they only work for two minutes. Doctors and surgeons like myself, not so much so. We know when we scrub in before a surgery, we are not eradicating all bacteria from our hands."

## HOW LONG WILL NANOLAVA™ RINSELESS NANO-CHARGED HAND WASH PROTECT ME?

After comparing **NANOLAVA™ RINSELESS NANO-CHARGED HAND WASH** to a leading branded Sanitizer (75% Alcohol),

the results speak volumes. **NANOLAVA™** formula is made using our proprietary Nano-Colloidal technology which reduces the molecules 20X smaller than normal, allowing the formula to penetrate the upper layers of the epidermis for deeper cleaning and extends its biodegradability, offering continued protection for more than 12 hours, which is a lot more than 2 minutes of protection that sanitizers offer.

Because our hands are porous and we are constantly using and washing them, we recommend that using **NANOLAVA™ RINSELESS NANO-CHARGED HAND WASH** as needed during the day. One of the amazing attributes of this all natural, organic hand soap (other than it being rinse-less) is you can actually feel the product's protective layer on your skin.
